Integrated Practices

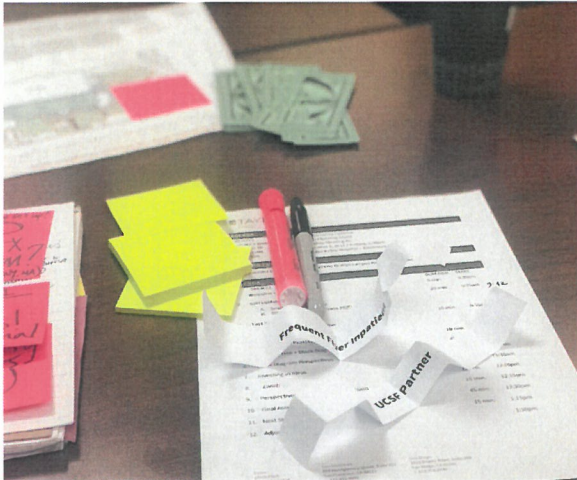

Healthcare Clients

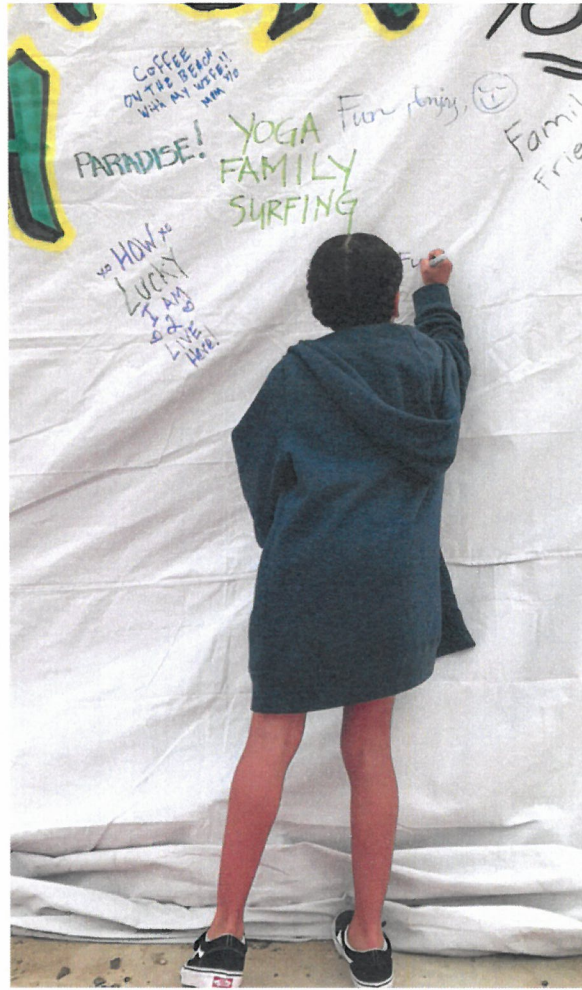

Design Process

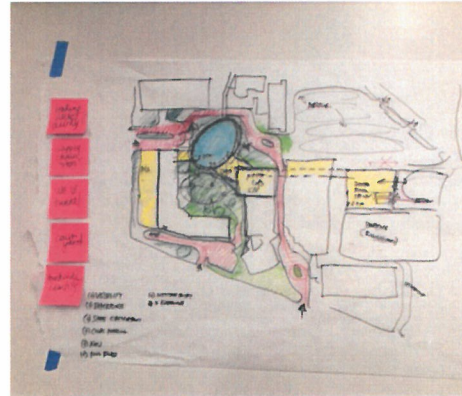

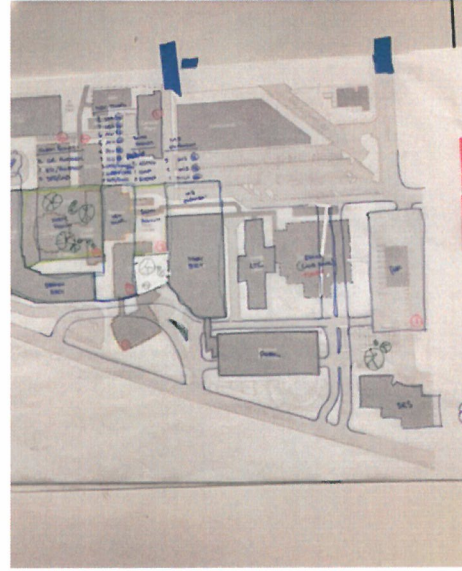

Working with Fallbrook Regional Health District we'll practice a human-centered design process throughout.

We'll ensure all client meetings are interactive, to align design ideas to your larger vision.

We'll engage directly with the community to understand local needs.

We'll facilitate a dynamic design charrette and generate tons of new ideas.

THE FRIENDLY VILLAGE

Imagine a future where a "holistic lifestyle campus" inspires a community-wide approach to wellbeing: healthy living, working, learning and playing, for residents of all ages, across Fallbrook, Bonsall, Rainbow, and De Luz. Where families grow food together, and prepare fresh dishes at a teaching kitchen. Where the young and young-at-heart take yoga or fitness classes in a peaceful courtyard, then enjoy a juice or coffee at a light-filled cafe. Where local entrepreneurs and non-profits share ideas and innovations in a collaborative workspace. Where outdoor concerts enthrall an audience in a landscaped amphitheater, and special events bring guests inside a converted church, now a stunning and contemporary A-frame. Here, avocado groves thrive, friendships bloom, and wellness is contagious.
